

Choice.LIVE is your preferred partner for webcasting and live streaming events.

Whether you're delivering high-tech convenience for your audience or creating a solution to comply with social distancing, Choice.LIVE combines event technology with webcasting and live streaming applications to bring the show to your audience, no matter where they are.

Choice.LIVE video production teams create hundreds of dynamic events a year including broadcast spots, event videos, social media campaigns, TV programs, executive communications and employee training. Our production studios include state-of-the-art audio and video editing suites for the most dynamic visual effects.

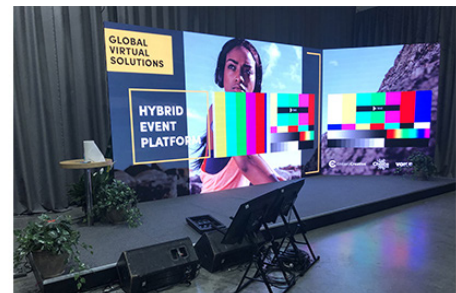

We produce your fully hosted professional event and broadcast the impressive result to your audience. The custom process is collaborative but we handle all of the difficult details while you focus on the message!

We are living in a new communication paradigm, and we've all quickly grown accustomed to using platforms such as Zoom and Webex and GoTo to meet with our colleagues, and we've simultaneously grown bored and frustrated with their limitations. There is a recipe for better engagement than another Zoom call, and Choice.LIVE has that recipe
