Our newest pair of mobile LED units are ready for your next event! These units utilize the latest in outdoor LED technology, featuring a 6mm black LED. With over 70% more pixels than the previous generation, the resolution is higher, image is brighter and the blacks are deeper than ever before. Take advantage of the small footprint and slim profile. The unit can be hidden quite easily and works well in large tents. With the ability to raise 5' higher than the Barco B-10, this unit is the right choice for your next event.
